## DETAILED ACTION

### *Specification*

1. On page 1 line 20, the word "does" is misspelled as "doe". Correction is required.

### ***Claim Rejections - 35 USC § 102***

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) do not apply to the examination of this application as the application being examined was not (1) filed on or after November 29, 2000, or (2) voluntarily published under 35 U.S.C. 122(b). Therefore, this application is examined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

3. Claims 1-7, 9-17, 19-27, 29, and 30 are rejected under 35 U.S.C. 102(e) as being anticipated by Galasso et al (U.S. Patent 6,374,302 B1).

Regarding to claims 1, 11, and 21, Galasso discloses an apparatus for communication (Fig. 2) employing a plurality of gatekeepers comprising a processor (col. 5 line 39) and a memory (inherent) coupled to said processor, and said memory storing instructions adapted to be executed by said processor for receiving at a first gatekeeper (first zone gatekeeper) a request for information (Fig. 2 col. 4 lines 53-57);

Art Unit: 2663

determining whether the information known by the first gatekeeper (Fig. 2 col. 3 lines 28-31, determine whether the address is outside the zone coverage); sending the request via at least one intermediate gatekeeper (master gatekeeper) to a second gatekeeper (second zone gatekeeper) if the information is not known by the first gatekeeper (Fig. 2 col. 4 lines 63-67, if the address is outside the first zone coverage queried the master gatekeeper, which in turn queried the second zone gatekeeper); receiving the requested information from the second gatekeeper via at least one intermediate gatekeeper wherein a hierarchical level associated with said first gatekeeper is different from a hierarchical level associated with said intermediate gatekeeper (Fig. 2 col. 3 lines 61-67, implies the master gatekeeper has a different hierarchical level with the zone gatekeeper).

Regarding to claims 2, 12, and 22, Galasso discloses storing the received information in at least one of the first, intermediate and second gatekeepers (Fig. 2 col. 5 lines 30-36).

Regarding to claims 3, 13, and 23, Galasso discloses determining the next gatekeeper in the gatekeeper-level path to the requested information (Fig. 3 col. 5 lines 2-7).

Regarding to claims 4, 5, 14, 15, 24, and 25, Galasso discloses the information includes an application address and resource information (col. 5 lines 50-57, Table 1).

Regarding to claims 6, 16, and 26, Galasso discloses sending the received information to a requesting entity (Fig. 6 col. 7 lines 64-67).

Art Unit: 2663

Regarding to claims 7, 17, and 27, Galasso discloses attempting to connect to a called entity using information contained in the information (Fig. 6 col. 8 lines 1-8).

Regarding to claims 9, 19, and 29, Galasso discloses the first gatekeeper is an inter-zone gatekeeper (Fig. 2 col. 4 lines 46).

Regarding to claims 10, 20, and 30, Galasso discloses plurality of zone gatekeeper can configured into a domain (col. 3 lines 54-56).

***Claim Rejections - 35 USC § 103***

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 8, 18, and 28 are rejected under 35 U.S.C. 103(a) as being unpatentable over Galasso in view of Sengodan (U. S. Patent 6,426,945 B1).

Regarding to claims 8, 18, and 28, Galasso discloses all the limitation with respect to claims 1, 11, and 21, except for determining whether a hop-count field has been set to zero and if the hop-count field has been set to zero, dropping the received information.

However, Sengodan discloses a request message (Fig. 4) includes a hope count field uses to determine whether the message propagates further or not, by if the resulting values is not zero the message is forwarded to the next destination or else it is not forwarded (col. 6 lines 41-49).

Art Unit: 2663

Thus, it would have been obvious to one of ordinary skill in the art, at the time of the invention, to include a hop-field count as taught by Sengodan in Galasso's system with the motivation facilitate inter-gatekeeper communication, wherein gatekeepers discover other gatekeepers and register with one or more of them.

### ***Conclusion***

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
